You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type

The product is a sub-fund of AM SURA SICAV, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

Term

The Fund is established for an unlimited duration. However the Board of Directors may decide to close this product under certain circumstances.

Objectives

Investment objective The Fund's objective is to achieve capital appreciation for investors through an active and diversified investment strategy in Asian equity securities.

Investment policies The Fund will allocate a substantial portion of its assets to Exchange-Traded Funds (ETFs), Undertakings for Collective Investment in Transferable Securities (UCITS), and third-party mutual funds that exhibit market risk exposure primarily in Asian markets. The Fund's investment will be distributed between 10% and 100% of its net assets in ETFs, and between 0% and 90% of its net assets in third-party mutual funds or UCITS. A key feature of this investment strategy is that between 70% and 100% of the Fund's net assets will be exposed to underlying securities domiciled in emerging Asian markets, and/or market risk in those markets, and/or those that derive more than 60% of their revenue from operations in those markets, while between 0% and 30% of the Fund's net assets will be exposed to underlying securities domiciled in the rest of the Asian markets, and/or market risk in those markets, and/or those that derive more than 60% of their revenue from operations in those markets.

The Fund is actively managed, which means that the Investment Manager will select, purchase, and sell investment assets with the aim of achieving the Fund's investment objective, without being managed with reference to a benchmark index.

Intended retail investor

The product is suitable for retail investors with limited knowledge of the underlying financial instruments and no prior experience in the financial industry. This product is compatible with investors who are willing to assume capital losses and do not require a capital guarantee. Additionally, it is compatible with clients seeking long-term capital appreciation, with a minimum investment holding period of over 3 years.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the

product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class.

This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of CARNE GLOBAL FUND MANAGERS (LUXEMBOURG) S.A. to pay you.

In addition to market risks, other risks may impact performance: liquidity, emerging market risk, operational, and suitability. Refer to the prospectus for further information.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between January 2021 and January 2024.

Moderate: this type of scenario occurred for an investment between September 2017 and September 2020.

Favourable: this type of scenario occurred for an investment between February 2016 and February 2019.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 USD is invested.

Example Investment 10,000 USD	if you exit after 1 year	if you exit after 3 years (recommended holding period)
Total Costs	118 USD	424 USD
Annual cost impact*	1.2%	1.3% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.9% before costs and 5.7% after costs.
